Hair

Colouring hair is the simplest way to transform yourself into a new woman. However, doing this continually is also one of the fastest ways to do extreme damage to your own locks. Never fear – wigs are here! Heat up your season with the latest colour trends in spicy red tones.

WARM & wiggled

We turn up the heat this season with sizzling hair colours and styles, as well as advice from hair expert Jawad Maphoto of Lajawi Beaute Café on how to care for coloured wigs while protecting your own tresses

THE HONEY-BRONZED ECLIPT

Eclipting is a trendy colouring technique that came to the fore in 2016 and is still going strong. It involves keeping hair darker around the face, while adding lighter colours (almost like baby-lights) to the rest of your tresses to frame your face beautifully. Think of it as the contouring version for your hair, rather than your make-up. Maintain a sleek and shiny mane with John Frieda's Frizz Ease Glossing Mist, R116.
