SHEDDING CELLS

Now is the time to get familiar with exfoliation, if you haven't already. Dull skin can easily be rectified by gently sloughing off dead cell build-up. Some skins can withstand the regular scrub process, which can be abrasive for others. Experts agree that the really effective skin smoothers are the AHA (alpha hydroxy acids) and BHA (beta hydroxy acid or salicylic acid) exfoliators. These break the bonds of dead cells, naturally and evenly shedding the sludge for a smoother, hydrated and firmer complexion. AHAs minimise lines and wrinkles, and the signs of sun damage, while BHAs are the perfect winter companion, working to shed dry, dull, flaky skin. □

ORIENTAL NOTES

Most of these exotic fragrances are made up of spicy, exotic powders, sandalwood, amber, vanilla, tonka bean and musk. If you want a strong bouquet that lingers for hours, you'll warm up to the rich perfumes and exotic notes of the orient.

72 DECEMBER 2019 | WWW.THELOVE.CO.ZA

APPLYING SCENTS CORRECTLY

Dab on your favourite fragrance the moment you step out of the shower. Your pores will be open, which allows deeper scent absorption. Fragrances rise, so apply them from the feet to the shoulders. Anything sprayed onto the neck rises and disappears. Apply stronger perfumes at the ankles for the aroma to radiate upward. Less concentrated essences should be applied to pulse points, where blood vessels give off more heat and act like fragrance pumps.
